Interact with Cloud Storage

3. Ingest USGS data

To ingest the data into the Compute Engine instance:

Step 1

SSH into your Compute Engine instance

Step 2

On the command-line, type:

```
git clone https://github.com/GoogleCloudPlatform/training-data-analyst
```

This downloads the code from github.

Note

If you get a git authorization error, it is likely that the github URL has a typo in it. Please copy and paste the above code.
