# CPB100: Google Cloud Platform Big Data and Machine Learning Fundamentals

This 8 hour instructor-led class introduces participants to the big data and machine learning capabilities of Google Cloud Platform. It provides a quick overview of the Google Cloud platform and a deeper overview of the data processing and machine learning capabilities (for a deeper overview of Google Cloud suitable for IT professionals and managers, see [CP100](#)). This class showcases big data solutions on Google Cloud, how easy it is to use, and gets you excited about what you can do with it.

Informative, learnt a lot about google cloud offerings.

Can get a feeling of usage and setups, but a bit rushed due to the amount of info.

However, this is a good bootstrap to getting more familiar and dirty our hands.

Thank you
