Interact with Cloud Storage

7. Publish Cloud Storage files to web

To publish Cloud Storage files to the web:

Step 1

On the GCP console, select all the earthquakes files that you uploaded to the bucket and click on **Share publicly**

Step 2

Click on the **Public link** corresponding to **earthquakes.htm**

Step 3

What is the URL of the published Cloud Storage file? How does it relate to your bucket name and content?

Step 4

What are some advantages of publishing to Cloud Storage? _____
