Interact with Cloud Storage

8. Clean up

To delete the Compute Engine instance (since we won't need it any more):

Step 1

On the GCP console, click the Menu (three horizontal bars) and select **Compute Engine**

Step 2

Click on the checkbox corresponding to the instance that you created (the default name was instance-1)

Step 3

Click on the **Delete** button in the top-right corner

Step 4

Does deleting the instance have any impact on the files that you stored on Cloud Storage? _____
