Interact with Cloud Storage

5. Create bucket

Create a bucket using the GCP console:

Step 1

Browse to the GCP Console by visiting <http://cloud.google.com>) and clicking on **Go To Console**

Step 2

Click on the Menu (3 bars) at the top-left and select **Storage**

Step 3

Click on **Create Bucket**

Step 4

Choose a globally unique bucket name (your project name is unique, so you could use that). Then, click **Create**.

Step 5

Note down the name of your bucket: _____

In future labs, you will insert this whenever the directions ask for <YOUR-BUCKET>.
