Setup rentals data in Cloud SQL   23 min remaining

3. Explore lab data in Cloud Shell

To explore the labs code in Cloud Shell:

Step 1

Start Cloud Shell if you have not already done so. On GCP console, click on the **Activate Google Cloud Shell** button:

Step 2

On the command-line, type:

```
git clone https://github.com/GoogleCloudPlatform/training-data-analyst
```

This downloads the code from github

S

Navigate to the folder corresponding to this lab:
